EDUCATION

Universitas Muslim Indonesia	**Sep 2020 – Present**
Computer Science	

Bangkit Academy 2023 By Google, GoTo, Traveloka	**Feb 2023 – Jul 2023**
Path Machine Learning	

Dicoding Academy	**Aug 2022 – Dec 2022**
Path Machine Learning and Front-end	

TECHNICAL SKILLS

- Elementary (1 years): Python, SQL, Machine Learning, TensorFlow, Git
- Basic (6 month): Data Visualization, Docker, Statical programming, Streamlit, GCP

WORK EXPERIENCE

Project Manager – Capstone Project Bangkit   **May 2023 – June 2023**

Responsible for the success of the capstone project and devised effective strategies to achieve project goals.

- Created effective communication with the entire team and delivered regular capstone reports providing clear status updates to all interested parties.
- Created clear project and task scheduling for each team member. This plan will provide clear direction and boundaries for the capstone project.
- Provide effective solutions, facilitate team discussions, analyze available options, and make informed decisions to keep the project on track.

Data Science – Capstone Project Dicoding   **Sep 2022 – Dec 2022**

Instrumental to the design, and implementation of machine learning systems that can classify Bisindo sign language and analyze the risk of failure.

- Collected datasets and saved according to format and cleaned datasets from errors, defects, and discrepancies.
- Prototyped a deep learning-based model for sign language classification and was responsible for deploying the model to the platform.
- Produced a report and presented the results of the 1-month capstone project..

PERSONAL PROJECTS   **May 2022 – Present**

- Implemented ResNet, MobileNets, and other Conv Nets in TensorFlow.
- Implemented Random Forest for text classification.
- Scraped 800 data from google maps for data analysis
- Designed and trained RNNs, LSTMs, and Attention networks for NLP
